Nationality: Indian | Visa Status: Employment Visa Sponsorship Required | Notice Period: 60 Days

PROFESSIONAL SUMMARY

Senior Lead Software Engineer with 10.5+ years of experience delivering high-performance web applications, large-scale monorepos, and scalable client architectures for global SaaS products. Specialised in frontend infrastructure, AI-driven engineering workflows, LLM orchestration, custom Claude Code skills, Model Context Protocol (MCP) servers, and HTTP Streamable Web Streams (fetch + ReadableStream). Proven record of leading solo platform migrations, cutting build compilation times by 96%, and establishing code quality guardrails across distributed teams. Experienced in leading engineering squads and mentoring junior developers through cross-team collaboration across product, design, and QA. Seeking a Lead Software Engineer / Engineering Manager role in Dubai, UAE.

CAREER HIGHLIGHTS

- Reduced cold-start build compilation from 2 minutes to 5 seconds, a 96% improvement, through a solo Webpack 5 to Rspack migration completed in 3 weeks.
- Built an AI test-authoring platform from zero, using LLM agents over HTTP Streamable Web Streams (fetch + ReadableStream) to auto generate, execute, and self-heal end-to-end test suites.
- Authored custom production Claude Code skills and engineered Model Context Protocol (MCP) servers, establishing strict multi-tier write-scope guardrails to secure autonomous agent workflows across the codebase.
- Led static dead-code elimination using Knip static analysis, removing 30,000+ lines of unmaintained exports and orphaned dependencies across the monorepo.
- Developed and maintained a 232-spec Playwright regression suite protecting release quality.

TECHNICAL SKILLS

AI & Agentic Tooling: Claude Code, Model Context Protocol (MCP) Servers, Cursor IDE, LLM Orchestration, HTTP Streamable (ReadableStream), Agent Guardrails & Write-Scope Design

Frontend Core: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, SASS, Responsive Web Design, Core Web Vitals

State, APIs & Streaming: GraphQL, Apollo Client, Zustand, REST API Design, Custom Cached Query Hooks, Server-Sent Events (SSE), HTTP Streamable Web Streams

Architecture: Monorepos, Micro-Frontends, Design Systems, Role-Based Access Control (RBAC), Module Federation

Build & Performance: Rspack, Webpack 5, Code Splitting, Knip Static Analysis, Bundle Optimisation

Testing, Cloud & DevOps: Playwright End-to-End Suite (232 specs), Node.js, Jenkins CI/CD Pipelines, Docker, AWS (EC2, S3, Route 53), Amazon Bedrock AgentCore

Leadership & Process: Engineering Squad Leadership, Developer Mentorship (6 to 7 engineers), Technical Knowledge Sharing, Agile Methodology, Git & GitHub Flow, Architecture & Code Reviews, Cross-Team Collaboration

PROFESSIONAL EXPERIENCE

SuperOps — Chennai, India

Jul 2022 – Present

Senior Lead Software Engineer

Progression: Senior Software Engineer → Lead Software Engineer → Senior Lead Software Engineer

- Led an engineering squad of frontend developers, driving sprint execution, architecture reviews, and cross-team collaboration across product, design, and QA to deliver enterprise features on schedule.
- Mentored junior and mid-level engineers on React best practices and monorepo code quality, while standardising a reusable UI SDK framework adopted across product teams.
- Architected an AI test-authoring platform from zero using React and Node.js, orchestrating LLM agents over HTTP Streamable Web Streams (fetch + ReadableStream) to auto generate, run, and self-heal end-to-end test suites.
- Authored custom production Claude Code skills and engineered Model Context Protocol (MCP) servers, establishing strict multi-tier write-scope guardrails to secure autonomous agent workflows across the codebase.
- Executed a solo Webpack 5 to Rspack migration in 3 weeks, reducing cold-start build compilation from 2 minutes to 5 seconds across 12 packages.

- Improved application load times through React lazy loading, route-level code splitting and per-package chunking strategy across the monorepo.
- Eliminated 30,000+ lines of dead code and unused dependencies across the monorepo using Knip static analysis.
- Maintained platform health with a 232-spec Playwright regression suite in Jenkins CI.
- Built role-based access control (RBAC) gates and high-frequency polling dashboards using custom cached Apollo query hooks, balancing data freshness against network load.

Freshworks — Chennai, India

Jun 2018 – Jul 2022

Senior Software Engineer (Customer-Facing Engineering)

Progression: Onboarding Engineer → Senior Software Engineer

- Mentored 6 to 7 junior and onboarding software engineers on React, REST API development, and UI architecture, conducting regular code and design reviews to accelerate ramp-up time.
- Worked directly with customers alongside Support, Customer Success and Sales teams to understand use cases and requirements, then partnered with Product Design to deliver the resulting UI.
- Built UI web pages and REST API services across Freshworks products using React, JavaScript, Node.js, HTML and SASS.
- Built a Customer 360 dashboard consolidating all of a customer's information into a single operational view.
- Integrated enterprise SaaS platforms including Jira, Salesforce, Zendesk and ServiceNow with Freshworks products through REST API services.
- Implemented multiple Freshworks add-ons and supporting REST API services to solve customer-specific operational use cases.
- Created UI wireframes and design mockups in Balsamiq, and led code and UI design reviews.

Infigenic, LLC — Bengaluru, India

Jan 2018 – Jun 2018

Software Developer

- Designed and implemented company web pages and landing pages.
- Built an integration connecting Freshservice with DocuSign using REST API services; the product was subsequently acquired by Freshworks.

Niche Video Media, LLC — Chennai, India

Mar 2016 – Dec 2017

Web Application Developer & Designer

- Designed and implemented web pages, landing pages, and plugins for a commercial video-hosting platform.
- Built a video player customisation feature from scratch with configurable player buttons, annotations and call-to-action overlays.
- Implemented an admin dashboard that dynamically generated Stripe pricing plans based on feature selection, storage, and bandwidth tiers.

EDUCATION

Bachelor of Engineering (B.E.), Computer Science

2011 – 2015

K.L.N. College of Information Technology, Tamil Nadu, India
